GVT51RFDVD ADDITIONAL INFORMATION

On some DVD disc formats the navigation (arrow buttons) buttons on the remote may not operate. In such cases please press the "TITLE" button on the remote then operate the arrow / navigation buttons on the remote controller.

DVD Function Button Please note the DVD function button on the remote control switches the unit between TV and DVD, after watching a DVD Disc press the DVD button to return to TV mode.

Warning and cautions

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The graphic symbols on the back cover of the set mean the following:

The lightning flash with arrowhead symbol within an equilateral triangle is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

INSTALLATION

LOCATE the receiver in the room where direct light does not strike the screen. Total darkness or a reflection on the picture screen can cause eyestrain. Soft and indirect lighting is recommended for comfortable viewing. ALLOW enough space between the receiver and the wall to permit proper ventilation. AVOID excessive warm locations to prevent possible damage to the cabinet or component failure.

CONNECTION

This TV receiver can be connected to 230V- 50Hz, NEVER connect to DC supply or any other power.

AUTOMATIC DEGAUSSING

All colour television receivers are sensitive to magnetic influences, usually caused by either moving the receiver from one place to another or using certain electrical appliances near the receiver. This residual magnetism as it is called, sometimes causes distortion which gives rise to "blotchy" areas of colour in the picture. To avoid these effects the receiver incorporates an automatic degaussing circuit which operates for a short while immediately each time the receiver is switched on using the mains switch. This circuit removes any residual magnetism in the metal parts of the picture tube and therefore ensures that each time the receiver is switched "ON" using the Mains switch, the purity of the colours displayed on the screen remain true and lifelike. If the set is moved or faced in a different direction, the mains switch must be switched off at least 10 minutes in order that the automatic degaussing circuit operates properly.

Warning and cautions

CAUTION

Never tamper with any components inside your set, or any other adjustment controls not mentioned in this manual. All television receivers are high voltage instruments. Your PICTURE TUBE is highly evacuated. If broken, glass fragments will be violently expelled. Scratching, shipping or undue pressure is dangerous and should be avoided. When you dust or wipe the PICTURE TUBE FACE or CABINET, the power cord should be pulled out from the wall then wipe the receiver with a dry soft cloth. All "inside work" on your receiver should be performed only by Professional Service Personnel.

DANGER

Invisible laser radiation when open and interlock failed or defeated. avoid direct exposure to laser beam.

LASER SAFETY

This unit employs an optical laser beam system in the CD mechanism, designed with built in safeguards. Do not attempt to disassemble, refer to qualified service personnel. Exposure to this invisible laser light beam may be harmful to the human eye.

THIS ISA CLASS-1 LASER PRODUCT. USE OF CONTROLS, OR ADJUSTMENTS OR PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN, MAY RESULT IN HAZARDOUS LASER LIGHT BEAM

**CLASS 1
LASER PRODUCT**

IMPORTANT SAFEGUARDS PREFITTED MAINS PLUGS

For your convenience a mains plug has been fitted to this appliance. For your safety please observe the following information.

1. Should the fuse in the plug fail remove the plug from the wall socket and replace the fuse with a 5Amp ASTA approved to BS 1362 fuse.
2. Never use the plug without the fuse cover fitted. Replacement fuse covers are available from your dealer or most electrical retail outlets.
3. If the mains plug is out off the cable, rewire the replacement plug in accordance with instruction give in this manual.
4. CAUTION: Under no circumstances should the discarded plug be inserted into the mains socket. To prevent a shock hazard carefully dispose of the discarded plug. Do not leave the plug lying around where children might see it. **WARNING:** To prevent fire or shock hazard do not expose this unit to rain or moisture.

CAUTION: DANGEROUS VOLTAGES EXIST INSIDE THIS UNIT DO NOT REMOVE COVER (OR BACK). NO USER SERVICEABLE PARTS INSIDE REFER SERVICING TO QUALIFIED SERVICE PERSONNEL. DISCONNECT FROM MAINS SUPPLY WHEN NOT IN USE.

This wires in this mains lead are coloured in accordance with the following wiring codes:

Blue..... Neutral

Brown..... Live

This wires in this mains lead must be connected to the terminals in the plug as follows:

Blue Wire..... N or Black Brown

Wire..... L or Red

Only a 5Amp fuse should be fitted in the plug fuse or at the distribution board.
WARNING: UNDER NO CIRCUMSTANCES MUST THE LIVE OR NEUTRAL WIRES BE CONNECTED TO THE EARTH TERMINAL IN A 3- PIN MAINS PLUG.

This symbol means that this unit is double insulated. An earth connection is not required.

Switching on/ off the TV set

- This section explains the use of the power button and remote handset to turn your unit on and off.

Switching on/ off the TV set

Switching on/ off the TV set

1 Press the Power switch on. The power indicator will light.

2 If the indicator is "Red" press the button  on the remote control. Alternatively you can turn the TV on with P+ or P- buttons, if the "Child lock" is not set .

Note :

1 To turn the set off to "Standby " press  button on the remote control.

4
AUTO
I

2 To turn off the TV fully, press the Power button and release.

Auto switch-off function

Should the signal input from the aerial be interrupted for more than 5 minutes, the TV will automatically switch to "Standby".

If the Tv is in A/V mode or the "background" is set to off (see page 18), the set will not switch to standby.

Searching channels

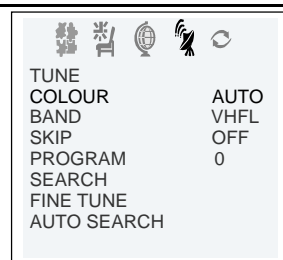

- This TV set has three methods to set the channels, which are respectively automatic, semi-automatic and manual fine TUNE.
- In this section, how to use the remote control to set the channel is explained. You can also use the buttons on the TV to set the channel.

Full automatic mode

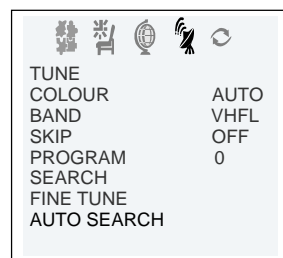

Automatic search

1 Press the TUNE button, the TUNE menu shown on the right display on the screen.

2 Press the P+/- buttons to select "AUTO SEARCH".

3 Press V+ to start the Auto search. All channels will be stored in the order they are received. After the search has finished, the first channel received will be displayed.

Display function

Press the CALL button, then the channel number and the systems will be displayed on the screen.

Searching channels (Continued)

Semi-automatic search

Semi-automatic search

1 Press the P+/- buttons or PROGRAM NUMBER (0-9) buttons to choose desired channels (I.E. channel 1) .

2 Press the TUNE button, the TUNE menu will be shown on the right of the screen.

3 Press the P+/- buttons to select "SEARCH".

4 Press the V- /V+ buttons to start search.

Press the V- to search down the scale and V+ to search up the scale.

To turn off the on-screen menu

In general, after you press the MENU button, the menu item display (PICTURE, TIME, FUNCTION, TUNE, EXCHANGE, ETC.) will automatically disappear within 15 seconds. If you want to eliminate these contents immediately, please press the EXIT button.

Searching channels (Continued)

Manual fine tune

Manual fine tune

If the picture and/or sound are poor, try using the **FINE TUNE** feature. Do not use this feature unless reception is poor.

1 Press the P+/- buttons or PROGRAM NUMBER (0-9) button to choose desired channels (I.E. channel 1) .

2 Press the TUNE button, the TUNE menu shown on the right display on the screen.

3 Press the P+/- buttons to select " FINE TUNE".

4 Press the V-/+ buttons all through to carry out fine tune, till the best picture and sound are obtained.

Searching channels (Continued)

Programme skip

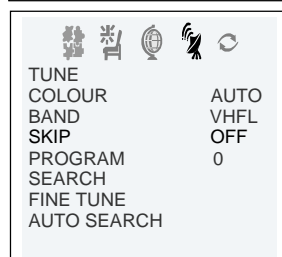

Programme skip

During "Auto tune" some channels may have been received which are of poor quality, noisy or ghosting. These can be removed with "Program Skip".

1 Press the P+/- buttons or PROGRAM NUMBER (0-9) button to choose desired channels (I.E. channel 1) .

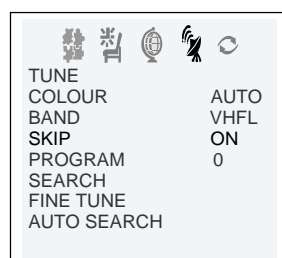

2 Press the TUNE button , the TUNE menu shown on the right display on the screen.

3 Press the P+/- buttons to select "SKIP".

4 Press the V-/+ buttons to turn the SKIP function "ON".

5 Press the TUNE button to close the menu. When you use the P+/- buttons to select channel, this channel will be skipped. However, you can still use the PROGRAM NUMBER buttons to select the skipped channel numbers.

If you want to recover the skipped channel

1 Use the PROGRAM NUMBER buttons to select the channel number to be recovered.

2 Repeat those steps just now.

3 Press the V-/+ buttons to turn the SKIP function "OFF".

Watching TV

Watching TV program

How to select a TV programme

Select the desired program

1 Using "Program number" buttons

- Directly enter the channel number with the numeric keypad on the remote control.
- To select channel numbers from 10 ~ 99 press [-/--] button and enter the two digit channel number
- To select channel numbers from 100 ~ 218 press [-/--] button twice and enter the 3 digit channel number

2 Using the P+/- buttons

- Press the P+ button to increase channel number.
- Press the P- button to decrease channel number.

Adjust the Volume level

Press the V-/+ buttons on the remote or the front of the TV set to adjust the volume level. The range is 0~100. When the volume buttons are pressed the volume level is displayed automatically on the TV screen.

Press the TUNE button, the TUNE menu shown on the right display on the screen.

• If the picture colour is incorrect

This may be due to the TV being set to the incorrect standard. Use P+ or P- to select Colour then the V+ /V- buttons to change between Auto, PAL, NTSC and NTSC443. Press the EXIT button to save the setting.

Watching TV (continued)

- !Swap function enables quick swap to the last watched program.
- Auto scan function enables automatic successive scanning of all the programs in memory with "OFF" skip status (each channel will last about 2 seconds).

Program swap and auto scan functions

SWAP

Program swap

1 Suppose the channel number you used just now is 8 and the channel number you are using is 18 (as shown in the figure).

2 If you want to return to the last watched program channel 8, you can simply press the SWAP button.

3 If you want to return to channel 18, press the button again. Through this function, you can easily change between the channel you are using and the channel you used last time.

Position exchange function

Exchange

Exchange

This feature enables TV programs that may be on a wrong TV channel number to be swapped/exchanged. This feature is very useful when Automatic Search Tuning has been used, to reallocate the found programs to the correct channel numbers.

1 Press the Menu button until the "Exchange" menu is displayed on the screen.

2 Press the V-/V+ buttons or the PROGRAM NUMBER (0-9) buttons to set PROGRAM 1 TO 6.

3 Press the P+/- buttons to select "PROGRAM 2".

4 Press the V-/V+ buttons or the PROGRAM NUMBER (0-9) buttons to set PROGRAM 2 TO 9.

5 Press the P+/- buttons to select "EXCHANGE".

6 Press the V-/V+ buttons to set "EXCHANGE".

Teletext

- Teletext is an information system, broadcast by certain channels, which can be read like a newspaper . It also provides subtitles for people with hearing difficulties or those who are unfamiliar with the language in which a particular program is being broadcast (cable networks, satellite channels, etc.). Teletext button on remote can be used in TV mode only. When using DVD or selecting AV1 /AV2, please do not press the text button.

Teletext

Teletext functions

To select "Teletext" press the Teletext button on the handset. To switch off Teletext, press the button again.

"Note all menu functions are not available in Teletext mode". Only a few direct button control functions are available in TELETEXT mode, they are:

- Volume adjustment, but without OSD display.
- Mute function, but without OSD display.

Page up/down

Use the P+/- buttons to browse next or previous page.

Page number entering

To select a Teletext page, enter the page number using the numeric key pad on the remote control, or use the P+ or P- buttons, or the coloured Fast text buttons.

Mix mode

To view the TV picture while in Text mode press the  button, this will superimpose the Teletext data on top of the Tv picture. Press this button again to return to Full text.

Teletext (Continued)

Teletext

Cancel mode

This feature allows the TV picture to be displayed while next page to be searched is entered and found. Only the top teletext line is displayed until the page is found. Press the button to hide the teletext information. Either press the ☒ button or the Text button to exit the cancel display mode.

Language change

Pressing the ➤ button will change the Teletext characters between Eastern and Western.

Hold

Pressing the ⏏ button will stop the teletext page automatically updating. This feature is very useful where there are several teletext pages or data on the same page number.

Size

Pressing the ⏏ button changes between full screen top half bottom half full screen. This feature is very useful as it magnifies the image making the characters easier to read.

Reveal

Pressing the ? button will reveal hidden text. This feature is used to reveal information such as answers to Teletext on-line interactive puzzles.

Subcode / Time

By entering its 4-digit number to enter a secondary page; While in normal TV mode only, pressing the button ⌚ will display the teletext time in the top right hand corner for a few seconds.

Switch teletext on/off

Press the ☰ button on the remote control to turn teletext On/Off.

Fast text coloured buttons

Fast text automatically displays the four most commonly used pages that the broadcaster thinks that you may want to choose next. Press the same coloured button on the remote control as the coloured link at the bottom of the teletext page to go directly to that page.

Basic Playback

Basic Playback

Preparations

- Press the TV/DVD button on the remote control or the TV to enter the DVD status.

Basic playback

1. Press OPEN/CLOSE to open the disc tray, place a disc on the disc tray.
There are two different disc sizes. Place the disc in the correct guide on the disc tray. If the disc is out of the guide, it may damage the disc and cause the DVD player to malfunction.
 - Do not place a disc which is unplayable in this DVD player.
2. Press OPEN/CLOSE to close the disc tray, the playback will automatically start.
 - Some discs do not start automatically. Press PLAY/ENTER to start playback.
3. Some discs may start playback with a menu. Use the cursor buttons on the remote control to select menu options and press PLAY/ENTER to start. You may also press the digit buttons to select a menu option directly. Many DVDs will not allow this during start-up.

Pause playback

1. Press PAUSE/STEP to pause playback (still mode).
The sound will be muted during still mode.
2. Press PLAY/ENTER to resume normal playback.

Stop playback

1. Press STOP ■ button to stop the disc playing. With some discs the player will memorize the stop position, such as DVD's and audio CD's.
2. Press PLAY/ENTER to playback to resume playback from the location where playback is stopped or from the beginning of the disc.
3. Press STOP twice to stop completely.

Previous and Next

During Playing, pressing the PREVIOUS ◀◀ key will restart the current chapter and skip chapters backwards with each subsequent press until the start of the disc is reached.
Each press of NEXT ▶▶ key during playing will skip the current chapter and play the next one.

Fast forward and Fast reverse

1. Press FWD ▶▶ to fast forward through the disc.
Each time the FWD ▶▶ button is pressed, the fast forward motion speed changes.
2. Press PLAY/ENTER to resume normal playback.
3. Press REV ◀◀ to fast reverse through the disc.
Each time the REV ◀◀ button is pressed, the fast reverse motion speed changes.
4. Press PLAY/ENTER to resume normal playback.

Single step playback

To "single step" press the "Pause" button, then press "Pause/Step" in continuous steps to view the next frame.

Advanced Playback

Advanced Playback

IMPORTANT NOTE:

ALL DESCRIBED FUNCTIONS ARE FOR DVD DISCS. IF YOU PLAY OTHER FORMATS, THE OPERATION AND DISPLAY ON SCREEN MAY VARY.

CAPTION

Press "CAPTION", the screen will display "SUBTITLE 01/XX XXXXX", "01" indicates the ordinal number of this language; "XX" indicates total number of language; "XXXXXX" indicates the language of country. (the number of language depends on disc). This function can select up to 32 languages displayed on screen.

REPEAT

Press "REPEAT" and Chapter repeat will be displayed on screen, the second press will display Title repeat, the third press will display All repeat, the fourth press will cancel this function.

A-B

Press A-B to select the Start point. Press again to select the End point. A third press will cancel the function.

ANGLE

When enjoying sports, concert or theatre, press this key to watch same actions in different angles. (Valid for discs possessing this function. Using a disc recorded in multi-angle you can view the scene from different angles, for example, front, side, whole view and exterior scene).

D.MENU

Press this key to display root menu, select item according to your preference. (This function will work with a DVD having a multi-layer menu.)

D.CALL

Pressing this key will cycle through "title elapsed", "title remain", "chapter elapsed", "chapter remain" and "display off".

PROGRAM

When playing discs, press "PROGRAM" to enter program mode. Press the digit buttons to select the program number that you want. When finished move the cursor to select "START". This will start the program playback.

SEARCH

Press "SEARCH" once to display the search menu. Use the UP/DOWN and LEFT/RIGHT cursor buttons to select the item you require. Press PLAY/ENTER to confirm.

SLOW

Press SLOW to play a disc in slow forward. Each time the SLOW button is pressed, the slow motion speed changes. Press PLAY/ENTER to resume normal playback;

Note: This function is invalid for CD and MP3.

TITLE/PBC

With some DVD discs pressing this key will display the title menu. You can then use the digit buttons to select the item you prefer.

AUDIO

Press this key can change the mode of audio. such as: Audio 1/2: AC 3 2 CH English
Audio 2/2: AC 3 5.1 CH English
Press this button to cycle between Mono Left, Mono Right, Mix-Mono and Stereo.

Note: Do not press this button continuously. Each press must have a 3 second delay.

Special Function Playback

JPEG DISC PLAYBACK

When a disc containing standard JPEG picture files is inserted into the player, a navigation menu will be displayed automatically. Use the UP and DOWN cursor buttons to select a file then press PLAY/ENTER. The slide show will commence. Press PREVIOUS or NEXT to move between pictures. Press pause to stop on the current picture. Press PLAY/ENTER to resume normal playing.

MP3 PLAYBACK

When playing an MP3 disc, a navigation menu will be displayed automatically. In the menu, use UP or DOWN cursor buttons to choose the folder, then press PLAY/ENTER to enter the folder. Use the UP and DOWN cursor buttons to select the file and press PLAY/ENTER. Pressing the LEFT cursor button will take you to the previous screen/menu.

SCREEN SAVER FUNCTION

This unit employs a screen saver mode to help protect the tube during static video pictures. This can be turned off on the GENERAL SETUP PAGE (see Pg. 28)

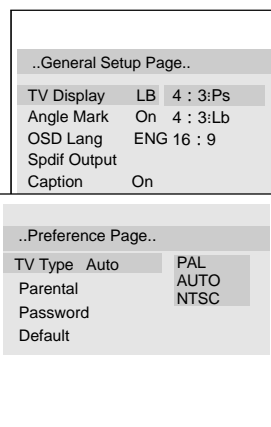

DVD System Setup

DVD System Setup

3. Press ▲ or ▼ to setup, then press PLAY/ENTER to confirm.
4. Press SETUP button to exit the menu.

General Setup Page

ASPECT RATIO DESCRIPTION

When using the DVD with the internal TV, select 4 : 3/LB.

The following information applies only when the DVD output is connected to external TV.

● 4 : 3/PS (PS = Pan and Scan)

You may select if you have a normal aspect ratio (4:3) TV, although the 4:3/LB (letter box) is a more common choice. In PS

mode, widescreen material will fill the screen, but at the expense of chopping off extreme left and right edges of the original film picture. For this feature to work, the disc must be specially coded. Such discs are uncommon.

● 4 : 3/LB (LB = Letter Box)

You may select this if you have a normal aspect ratio (4:3) TV. Widescreen material will be shown in pure unaltered form, allowing the entire picture area of the original film to be viewed without any side cropping. Black bars will appear above and below the picture.

● 16 : 9

You may select this if you have a widescreen (16:9) TV. Black bars may still appear above and below the picture even if using a widescreen TV. This is because some film directors prefer to use ultra widescreen aspect ratios e.g. 2.35:1. This will normally be indicated on the DVD packaging.

DVD System Setup

General Setup Page

ANGLE MARK: Users can select a particular camera angle when playing a DVD which offers multiple angles.

This item allows you to set Angle Mark ON or OFF.

On Screen Display (OSD) Language: Users can select on-screen display language.

SPDIF OUTPUT MODE: Sets the audio outputs.

This DVD player includes three kinds of audio output:

1. **SPDIF OFF:** An analog surround sound format is output through the back-panel connections for 2-CH audio out or 5.1 CH audio out.
2. **SPDIF/RAW or SPDIF/PCM:** This surround sound format is output to a Dolby Digital/DTS decoder through the coaxial connector on the back panel of the product.

CAPTIONS: This function allows you to display or hide the caption.

SCREEN SAVER: If the screen saver is on, then there will be an animated picture of DVD on the screen whenever the DVD player is idle for more than 3 minutes.

Playable Discs

The following discs can be played:

DISCS	LABEL	CONTENTS	DIMENSION
DVD VIDEO		Audio +Video (moving picture)	12cm
			8cm
AUDIO CD		Audio	12cm
			8cm
HDCD		Audio	12cm
			8cm
MP3		Audio	12cm
			8cm
JPEG		Video(picture)	12cm
			8cm
KODAK CD		Video(picture)	12cm
			8cm
CD-R		Audio or Video (moving picture)	12cm
			8cm
CD-RW		Audio or Video (moving picture)	12cm
			8cm
CD+G		Audio(picture)	12cm
			8cm

- You cannot play discs other than those listed above.
- You cannot play discs of non-standardized discs, even if they may be labelled as above.
- The performance of CD-R or CD-RW disc is depend on the way of disc-burning. In a few cases, their performance may be not very well or even no performance.

Disc Protection and DVD Characteristics

ON HANDLING DISCS

- Do not touch the playback side of the disc.
- Do not attach paper or tape to disc.

ON CLEANING DISCS

- Fingerprints and dust on the disc cause picture and sound deterioration. Wipe the disc from the centre outwards with a soft cloth. Always keep the disc clean.

- If you can not wipe off the dust with a soft cloth, wipe the disc lightly with a slightly moistened soft cloth and finish with a dry cloth.
- Do not use any type of solvent such as thinner, benzene, commercially available cleaners or anti-static spray for vinyl Lps. It may damage the disc.

ON STORING DISCS

- Do not store discs in a place subject to direct sunlight or near heat source.
- Do not store discs in place subject to moisture and dust such as a bathroom or near a humidifier.
- Store discs vertically in a case. Stacking or placing object on discs outside of their case may cause warping.

STRUCTURE OF DISC CONTENTS

Normally, DVD discs are divided into titles, and the titles are sub-divided into chapters. Audio CD are divided into tracks.

Each title, chapter, or track is assigned a number, which is called title number, chapter number or track number respectively.

There may be discs that do not have these number.
