01 Safety Instructions

Please ensure that you read all of the safety instructions before using this unit.

Safety Considerations

- Position the power cable and other connected cables so that they are not likely to be walked on, pinched or where items can be placed on or against them.
- Do not use the unit in humid or damp conditions.
- Do not allow the unit to get wet.
- Never allow children to insert foreign objects into holes or slots on the unit.
- The ventilation should not be impeded by covering the openings with items such as news-papers, tablecloths, curtains, etc. Full stop after overheating.
- No naked flame sources, such as lit candles, should be placed on the unit.
- Do not expose the unit to dripping or splashing, and no objects filled with liquids, such as vases, should not be placed on the unit.
- Do not place the unit in closed bookcases or racks without proper ventilation.

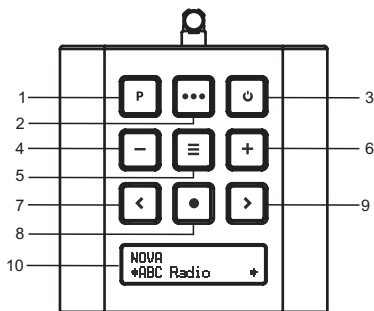

Cleaning

- Disconnect the unit from the mains supply before cleaning.
- Do not use any liquids or aerosol cleaners, as this may damage the unit. Use a soft, dust free cloth.

Servicing

- There are no user serviceable parts in the unit. When servicing, refer to qualified service personnel.
- Consult your dealer if you are ever in doubt about the installation/operation/safety of the product.

03 What Is DAB

Digital DAB was developed in Europe by a consortium of broadcasters and manufactures. DAB uses digital compression techniques to transform the source material, i.e. music and speech, into better quality audio.

Interference free reception

Analogue systems suffer from an effect called "multipath distortion". This is caused because waves do not behave in a orderly fashion, but bounce and reflect off buildings etc. DAB sees this as an advantage and uses the direct and reflected signals to actually reinforce the end result, allowing for better service most of the time.

No need to re-tune

A signal DAB frequency can be used to cover the whole of U.K., solving many of the problems experienced with the earlier analogue DAB scan automatically tunes in all of the available stations in your area.

Scrolling Text

Broadcasters can transmit text to your radio, this way you can read the name of the DJ, Artist, song title or any other information they choose.

DAB Coverage

Check your local coverage at www.ukdigitalradio.com, to check if you are in a DAB broadcast area.

Getting Started

04

Carefully remove your DAB receiver from the box. (we recommend you keep the package for future reference.)

1 Connect the power

2 Extend the telescopic aerial

3 Turning on the radio

4 Changing the volume

2 FM mode

Repeatedly press the MENU button to cycle between the following display modes: Radio Text, Signal Strength, Time/Date, Channel Frequency, Auto

If a fault occurs, first check the points listed below before taking the set for repair. If you are unable to remedy a problem by following these hints, consult you retailer or service centre.

WARNING: Under no circumstances should you try to repair the set yourself, as this would void your guarantee.

Troubleshooting

All electrical and electronic products must not be disposed of with household waste. Please refer to the retailer from whom you purchase this item for disposal instructions.

Packaging materials can be recycled using your local collection facilities.

PROBLEM	SOLUTION
No sound	Adjust the volume control, it may not be turned up.
Static sound	Signal reception too low. Adjust the aerial or move the unit to a stronger signal location.
Sound is distorted	Volume is too high. Adjust the volume control.
Desired station not found	Weak signal. Use the manual tune function.
The display shows "No service"	No DAB coverage in your area or poor reception. Adjust the position of the aerial.
The display is blank	This may occur if the broadcaster changes the label of the service or removes a label while tuned. The radio will try to retune or perform a scan.
